

# **Project Objectives**

- To understand the problem and classify if it is a regression or a classification kind of problem.
- To understand the dataset and know how to pre-process/clean the data using different data pre-processing techniques.
- To apply different algorithms according to the dataset.
- To know how to find the accuracy of the model.
- To build web applications using the Flask framework.
- To build a Machine Learning Model and deploy it on the IBM Cloud.
